THIS SEAT HAS A HEAD.

The overlooked second rider.

A campaign on the seat they are about to occupy.

BEFORE YOU SIT

THIS SEAT HAS A HEAD. YOURS.

Pillion passengers need a helmet too.

Put on and fasten your helmet before you ride.

STUDENT PROTOTYPE / REMOVE BEFORE MOUNTING

The person on the second seat.

Cause: pillion helmet use on everyday shared journeys.
Focus: adult driver-pillion pairs, stationary before departure.
Not a new product, app, rental scheme or service.

Age 18-30 and private-parking setting are strategic choices, not measured local prevalence.

14,652

Passenger fatalities recorded in the non-wearing-of-helmet category in India, 2024.
54,122 total fatalities in that category.

MoRTH data via inspected OpenCity table records and Hindustan Times, 12 June 2026. Same underlying dataset; original ministry table cells not directly inspected. Not proof nonuse caused every crash.

Knowing is not always doing.

346 adult crash patients in one eastern-India hospital sample.
96.6% agreed helmets were essential; 35.7% had used one.
Short-distance travel and forgetfulness were associated with nonuse.

Mishra et al., 2025; data March-December 2021. Hospital sample, not national/Mumbai prevalence. Association, not causation. PMC12020946 / DOI 10.4103/ijciis.ijciis_85_24.

Make the second person present.

Audience: adult student / early-career driver-pillion pairs.
Hypothesis: on an ordinary shared ride, the second seat can become an afterthought.
Put the reminder where the second person is about to sit.

Creative hypothesis, not a participant quote. Local reasons for nonuse remain to be tested.

Their own helmet. Before the ride.

Proposition: the second person needs their own helmet too.
Action: both helmets on; both chinstraps fastened.
Tone: direct, considerate, no blame or simulated enforcement.

Correct helmet use reduces risk, not all risk. WHO road-traffic fact sheet, 20 July 2026; PIB helmet guidance, 12 July 2025.

Three routes.
One campaign.

01 SECOND-SEAT MESSAGE - selected: seat is the placement.
02 TWO-PERSON PARKING SLIP - rejected: close receipt precedent.
03 PLUS-ONE RIDE INVITE - reserve: before-ride social message.

Receipt precedent: HDFC Bank / STUDDS, The Helmet Receipt, reported February 2026. No claim of exhaustive originality clearance.

The seat supplies the meaning.

An A6 card rests on the stationary pillion seat.
It addresses the passenger at the mounting decision.
No scan. No sign-up. No new service.
Facilitator removes it before anyone mounts.

Opt-in, permissioned, supervised placement only. No adhesive or vehicle alteration. Stop if safe collection cannot be assured.

THIS SEAT HAS A HEAD.

YOURS.
Pillion passengers need a helmet too.
Put on and fasten your helmet before you ride.

BEFORE YOU SIT

THIS SEAT HAS A HEAD. YOURS.

Pillion passengers need a helmet too.

Put on and fasten your helmet before you ride.

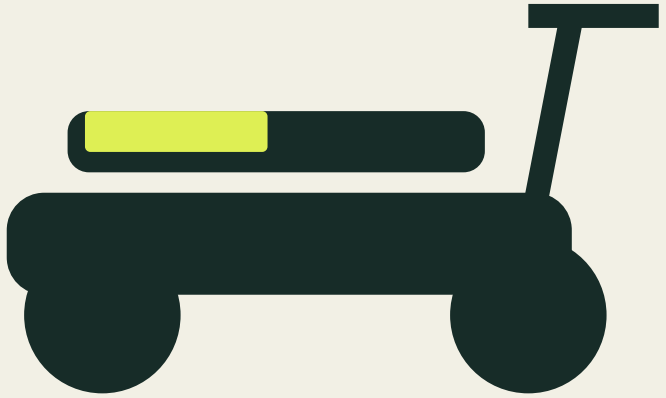

STUDENT PROTOTYPE / REMOVE BEFORE MOUNTING

Finished A6 artwork supplied as PDF, SVG and PNG. Supervised prototype; remove before mounting.

Where the second person is about to sit.

A parked vehicle. Engine off. Adult participants opt in.
Message placed briefly on the rear seat.
Card collected and accounted for before mounting.

ILLUSTRATED STATIONARY PLACEMENT

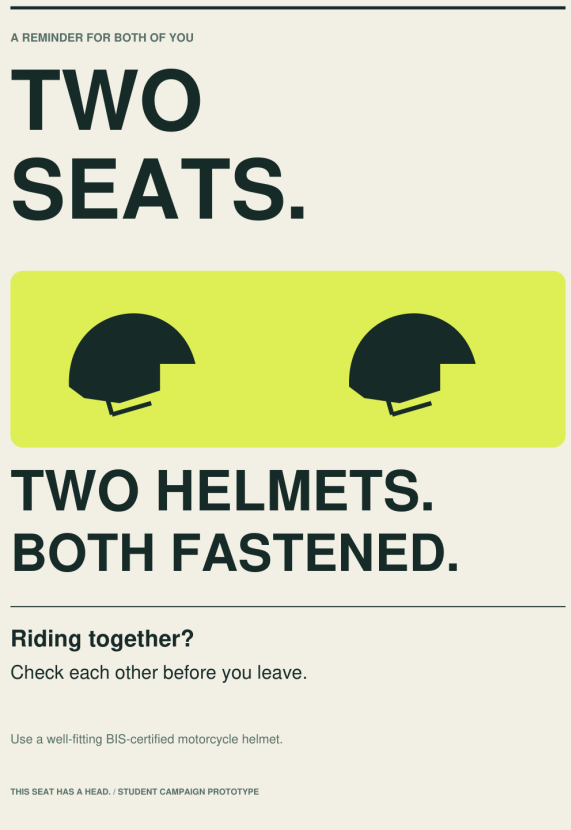

Rear-seat card removed before anyone mounts.

Illustrated placement mockup, not a photograph or evidence of deployment.

Two seats.
Two helmets.

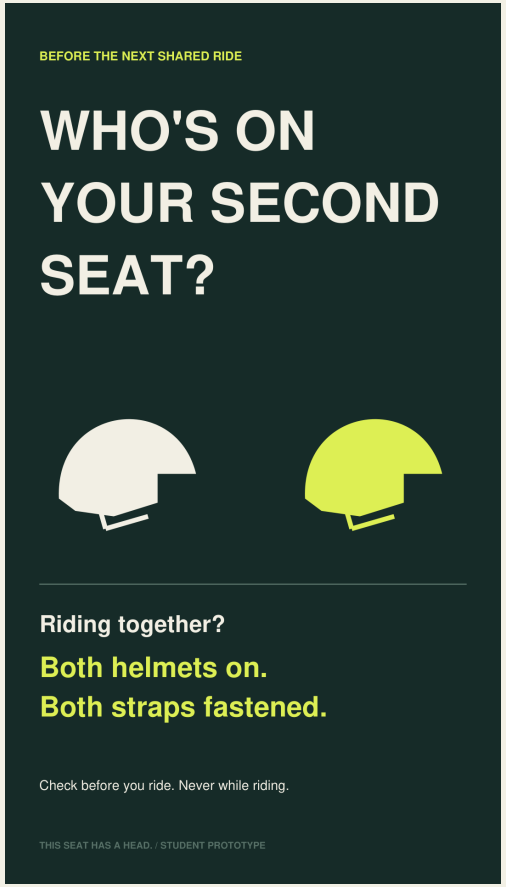

Equal-scale helmet symbols. One clear instruction.
Deep green + warm ivory + signal yellow-green.
Supporting poster reinforces the pre-ride check.

No certification marks, police styling, sponsor logo, crash imagery or claim of guaranteed protection.

Who's on your second seat?

A captioned 15-second illustrated sequence.
One bike / two people / two helmets / both fastened.
Check before the ride, never while riding.

HTML motion prototype and vertical artwork supplied. Not live-action footage or a claimed platform deployment.

Small enough to demonstrate safely.

12 reusable A6 cards + 2 A3 posters.

Permissioned stationary encounter; no unattended placement.

No helmet or vehicle attachments.

No permission? Use the illustrated demonstration only.

No partner, venue access, participant consent or filming is claimed to have been secured.

INR 700

Cards 180 / Posters 160 / Proofs 160

Consent and tally sheets 50 / Contingency 150

Uses existing print media and a supervised setting.

Planning assumptions, not vendor quotes. Excludes labour, travel, permissions, tax changes and helmet purchase.

Did the message actually arrive?

Proposed comprehension test: 12 consenting adults.
Proposed revision gate: 10 identify passenger helmet use + fastening before departure.
Ask openly about meaning, tone, timing and confusion.

No tests conducted. Threshold is an operational design gate, not a validated benchmark. Any safety concern triggers revision.

Measure the check.
Do not promise lives saved.

Optional pilot: aggregate observations of paired departures.
Record both helmets, visible straps and unknown observations.
No plates, faces, names or equipment-certification claims.
An uncontrolled small pilot cannot establish causality.

Plan only. Do not report invented lifts, audience quotes, crash reductions or long-term effectiveness.

From evidence to one clear action.

14 OCT - cause, research / insight, three concepts.
21 OCT - design WIP and feasible comprehension work.
27 OCT - campaign submission.
28 OCT - presentation and final review.

Dates as supplied in the assignment brief; brief specifies no year. Actual fieldwork, permissions and outcomes remain unclaimed.

Traceable facts. Honest limitations.

THE TAKEAWAY

Two seats.
Two helmets.
Both fastened.

The second person is not an afterthought.
